

Informational Interview:-

Name & Designation: XYZ, Senior Data Scientist, Fidelity Investment

Type of Meeting: Zoom

After sending a LinkedIn Connection Request, I had arranged for a virtual meeting with a person who is working as a Senior Data Scientist in Fidelity Investment.

The meeting began with a brief introduction about myself where he got to know about my background and my current work. Then he began sharing about his role as a Senior Data Scientist in his current Organization. He shared his day to day activities, the kind of Technical knowledge one needs to have to be successful in his role and also he talked about getting domain knowledge as this was also very important in his work. As a Data Scientist, it was his job to identify emerging trends, keep a close watch on the financial market scenario apart from upgrading his skills from time to time. He spoke about his entry into this field and his past background. He began his life in IT as a Java Developer and then did his Masters in Computer Science. After doing that he did his PhD in Data Science and began working as a Data Scientist in Fidelity. He slowly made his way up to a Senior Data Scientist and now leading a time as well.

He asked me to share my journey into data and offered tips and suggestion to be successful in this field. Our topic then diverted to his personal life and he shared he got married two years back to his colleague. They have a common interest of travelling and together they want to travel a lot of places and make good memories.

The meeting ended with him offering a referral whenever my course at Springboard gets over. He also shared his personal Phone number and email and asked me to send any query over mail if needed.

P.S:- Name of the Person not shared due to confidentiality purpose.
